

Product change for shielded M8 angled housings

Dear Sir/Madam,

As part of the continuous improvement of our products and in addition to a tooling renewal, we are making dimensional adjustments to our shielded M8 angled connectors. These changes serve to improve quality and enable easier assembly.

These adjustments will have no impact on your application. You can continue to use the new connectors as a direct 1-to-1 replacement.

The dimensional adjustments are minimal, therefore the main dimensions remain virtually unchanged. The visual changes can be seen in the following images and drawings.

Due to supply chain requirements, we are implementing the change to the new housings with immediate effect. The changeover will be completed over the coming months, depending on the current stock levels. For this reason, a specific cut-off date cannot be provided.

Do you still have questions? Please reply to this email, we will be pleased to assist you.

Kind regards
